

Department of the Army Biography

Mr. Adam J. Nucci

Director, Policy, Resources and Analysis and Chief Financial Officer (CFO)

Mr. Adam Nucci became the Director for Policy, Resources and Analysis and the Chief Financial Officer at the Headquarters, Department of the Army, Chief Information Officer (CIO) on August 13, 2023. As the Director and CFO, Mr. Nucci is responsible for the requisite vision, direction and technical advice relating to all aspects of planning, programming, and budgeting for the Army's Command, Control, Communications and Computers and Information Technology (C4/IT) programs. Mr. Nucci oversees the Army's IT appropriations, totaling more than \$19 billion and drives IT management and financial management data management reform initiatives, including an annual execution of \$500 million for enterprise licenses. He leads Army IT policy, business case analyses, implementation, category management, audit readiness and policy development to provide enterprise services, portfolio management for IT investments in National Security Systems, IT, Cyberspace Activities, Internal Use Software and Business Systems.

Mr. Nucci previously served as the Deputy Director of Strategic Operations Directorate, HQDA G-3/5/7. He was responsible for developing strategies, policies, and plans to provide integration, synchronization, and prioritization of war-fighting mission area data-driven capability transformation for multi-domain operations. He also oversaw the training and readiness mission for Army business systems modernization, warfighting transformation of the warfighting mission area and Army efforts to operationalize data, integrate intelligence with operations and deliver integrated mission command capabilities. He led capability portfolios and reform efforts to quantify resources associated with MDO missions and the overall Army network with influence over the more than \$11B annually. Through these responsibilities he led a 150 personnel organization and influences integrated Army Programs, Strategies and resources to operationalize Information Advantage including cyberspace operations, electronic warfare, information operations and paving the way for Army implementation of Joint All Domain Command and Control (JADC2) under the Army Campaign Plan, the Army Vision and Army implementation of the National and Defense Strategy.
